

## Fenics FXO Trade Data Offering

Fenics Market Data, winner of the 2021 FX Markets e-FX Awards 2021 for 'Best Market Data Provider', harvests billions of data points daily from BGC Groups' venues, and then centralizes and curates this data into multiple datasets providing comprehensive FX Options Solutions. As the regulation in financial markets, such as MiFID II, MAR, Dodd-Frank and FRTB, increases, it is apparent that there is a greater need for specialist data to complement the work of valuations, risk and surveillance departments.

The Fenics Market Data FX Options Provenance Data offering consists of Level 1 and Level 2 data made up of firm, capital-backed prices.

**EURUSD Call Vol 5-95delta**

### Recent FXO Price Movement

#### EUR/USD German Election Uncertainty

With all eyes on the German election and Olaf Scholz narrowly becoming the next German Chancellor, we saw significant 1-day volatility in EUR crosses around the election.

Level 1 package provides access to top of book data displaying the real-time best bid and offer of an instrument at a given point in time. Our Level 1 data is made up of 85 currency pairs available direct via sFTP or through our channel partners, Bloomberg and Refinitiv, and can be delivered on an hourly, intraday or EOD basis.

	Tenors	Price Types
